Land-Office Utilized. Our Land Office is divided into two branches: one has charge of the Roads and Public Buildings; the other sells, leases, grants of disposes of the Crown Lands. Now the latter is what we propose to talk about; and to commence we are sorry to say that it is not all we could wish. It is doing some good, but under different management, we believe it could do a great deal more. There is staff enough to accomplish far more than has ever been effected. But the office don't seem to be practical enough to suit our wants. We look on a public land office in the same way as we look on the private land-offices of Lowenberg, Heisterman, or Alsopp. We regard it as an office where every effort is or ought to be made to get people to settle on and utilize the Crown Lands It any private Land Agent has land to sell he tries to find a purchaser; if he has land to lease, he bunts up a tenant. Now that is just what our Land Office never does; and it is just what it ought to do, and just what it is expected to do. The people of this country don't want a Land Office for ornament; they. require it for utility, -and for utilitarian purposes only. We venture the asser-tion that if any private person had owned British Columbia for the last twelve years, he would have had ten tenants on the land to one that there is now. In fact were our Crown Lands the estate of a single landed proprie or, he would have no difficulty in locating five thousand men, women and children, every year upon it. What a private person might do with his estate, the Government could also do by means of a well digested scheme to settle up the country. But let us see what it has done. In 1867, the resolutions that appear in another part of this issue, were passed by the Legislative Council. We believe they contain the outline of a scheme, that if supplemented with a small immigration fund, and carried into operation would answer every present end of the Colony in settling up the Crown Lands. Even without any additional grant of money, we believe that if the plan sketched in the resolutions were carried into operation, there would be a vast advance on the let alone system that now prevails in the Land Department. It is three years and over since the resolutions were passed. During that time, we have had Governor Seymour, Acting-Governor Hankin, and Governor Musgrave, - and the Department has been under a Chief and an Ass'stant Commission r, and what has been done to carry out the spirit of the reso-Intions? By the removal of the Capital, the Chief Commissioner has been located in Victoria, -an additional room has been added to the Land Office, - s few new maps have been made or extended, -and a few people have voluntarily recorded a few pre-emptions. We are not aware of anything else having been done by the Department, except, possibly, the little attention that has been paid to roads, on the mainland, and the very little that has been unsatisfactorily done on the Island. The general Government has also assisted twenty odd females to come to the conntry. That is the sum, we think, of all that has been done in three years. Now, we put the question to those who pay the taxes - to those who have invested their all in real estate in this country-to those who have fixed their homes here, in the expectation of seeing the country fill up rapidly with population—has the Land Office during the last three years done its du'y? Have Gov. Hankin and Gov. Musgrave done their duty towards settling up the country? Can there be any other answer do Light do ... 25
but—"No, it has not? No, they have not?' The substance of the people has do Light do 50
been and is being eaten up, with very do do 150 ... 25 poor results indeed in the way of developing and settling up the country.

Colony after Colony might have been formed in Victoria alone and conducted under 12 years. to different agricultural districts, and by
this time have become prosperous, if the
Land Office had discounted the conducted by the conducted Land Office had directed some of its force to do the work. But no ; the Potatoe Gathering, 100yds 25 force to do the work. But ho; the force, if not wasted, was at least badly applied. If Gov. Musgrave had done his duty, can any one believe that the Land Office would not have had agricultant of the state of the s Four to contest in each Game, or no mone paid. tural reports in a compendious form, suited to the immigrant who might apply at the head office for information? Can allow any one believe that with magistrates, clerks, and constables scattered over the whole country, and who under the Land Ordinance exercise authority to carry quired to the immigrant? Whose fault is it, that these things have not been done? We cannot lay the whole blame would have given every information reon the Land Office. Others must share

stricter accountability than the Gover-nor himself. Why if another officer had

onired to act as Emigration Agent,

"-- would have

a thousand dollars were required for induce immigrats to settle in the country, the Governor's salary could have atood reduction to that amount. Bo h the agent and the reports could have been paid out of the Governor's salary. But strange as it may appear, our Governor who has been eulogized as a paragon of perfection, not only draws his enormous salary, but ignores the necessity of an Emigration agent, never notices the necessity for portable information for immigrants, and never inaugurates such reforms as would utilize the Land Office. The real truth must stare every one in the face, that if people want the Land Office to be utilized, we must have a people's Government,

A Look at the City Front

At Lachapelle's, James Bay Bridge, everything is very lively at this season of the year on account of the number of pleasure parties out bosting. The next what is the one known as Kavanagh's. At present it is occupied by the San Juan Lime Company, and will be used by vessels from the kiln, with lime. At present there are no vessels there A little further along is Sayward's lumber yard and wharf, which is looking tirely, notwithstanding the dullness of the lumber trade at p esent. The schooner blize is discharging a cargo of lumber from Sannich, there. The H. S. Co's wharf is next. The only vessel there is the three-masted schooner A. P. Jordan: from the Sandwich Islands, unload-Jordan: from the Sandwich Islands, unloading a cargo of Island produce. Nathan's wharf is nex!, and looks very quite; not being any shipping there. Lenevew or Russet's wharf is rather in a dangerous state for horses or waggons. There are two small ve-sels there, repairing their sails, &c. Brod rick & Co.'s vi arves are about the live liest, there being several drays employed bauling freight from the bonded stores. The schooner Black Diamond arrived there to-day from Nanumo, via Esquima t, where she landed 60 tons of coal. She brought 40 tons here, and landed it on the wharf. Sproat & Co.'s wharf. This wharf which co t a large sum of money, is very little used, except by the steamers Fly and builty Harris, which generally lay there. At pre-ent the irrepressible "Jemmy Jones" is making a good deal of noise around there, about the superior to Messrs. Boscowitz & Co. There is no trade for her at present, consequently she is laid up. Janion, Rhodes & Co's wharf. This wharf has been a little lively since the arrival o' the Alpha, there being quite a lot of freight landed n it from that vessel. Dick son, Campbe is & Co.'s wharf. This splendid wharf presents rather a dull appearance at present. The steamers Grappler, Sir James lough s and Isabel are lying there, the two want of employment. A little further along is New Venice, where the Italian fishermen's boars and boat houses are to befound. They are an industrious body of citizens, and work hard, both day and night, at their vocation. The next is New Hong Kong, where a num-ber of Chinamen work at all kinds of employ-ment; such as fi-hing and wood-chopping. There is a Chuese junk lying there, which is used for carrying wood from the coast to the

ANSWER TO A CORRESPONDENT -In answer to's correspondent, with reference to an item which appeared in this paper a few days ago about net-fishing. We publish the law on the subject, which passed the House of As-sembly of Vancouver Island 5th of September, 1862, for the information of our correspondent, "T. T.," and the public generally. On her retarn she will proceed to San rancisco, and from there go into the seal fishing business among the Islands of St. Paul and St. George.

DANGEROUS SIDEWALK .- We would call the attention of the City Fathers to the danger ous state of a sidewalk at the foot of Johnson street, near Wharf. Several parties have got hurt by being thrown down; all the boards are loose. A sidewalk by-law was passed last year, why not put it in force.

Latest Okanagan Mews.

Several new settlers have located in the ricinity of Okauagas. The crops around the settlement around the Okanagan is prosperous, and plenty of fine land remains unoccupied that may be pre-empted. The want of postal communication is much felt by the settlers. If there were a regular weekly or semi-monthly mail sent to Okanagan, it would tend most materially towards the permanent settlement of that valuable sction of country A party of three with two In tiens had gone to therry Creek to open a new trail to the cilver lead, in order to cut off from eight to ten miles of trail and to avoid the crossing of the Susswap twice. MORE ABOUT THE WRECK OF THE

We have the following interesting account of the wreck of the Active, from a gentleman who visited the scene:

She went a hore nearly at high water, Sunday, the 5th, drawing eight and one-half feet of water; and any rock upon which she struck must be nearly awash at law water, with a constant break during the least swell. On the 7th, when our informant saw her, she was headed directly on shore, listed to port, and then exhibited no evidences of injury above her copper. She was lying mo-tioniess; but if the rock formation under her is the same as that between her and the beach (flat, disconnected rocks, with de-p water between them), she is probably opened in several places by uneven bearing. The sea was unusually calm when she was beached, or many lives must have been sacrificed, on account of the peculiarly unfavorable character of the locality for making a safe

mile south of the sou hern extremity of Point Gordo, in latitude 43 deg. 13 min., and about fifteen miles southward of Cape Mendo ino and seventeen miles northward of Shelter Cove On her voyage she sighted Point Arena in latitude 38 deg 57 min., six'y; seven miles northwestward of Point Rey-s seven miles northwestward of Point Reyes and ninety-three miles sonth vard of Cape Mendocino, and was supposed to shape a course for Cape Mendocino, but seems to have made the land close aboard in the hight of the coast-line, hardy half way between Point Arena and Cape Mendocino.

The vessel lies about five or six miles

northward of the Shubrick's disaster. There are no outlying breaks visible where the Active lies, and the charts give fifteen and sixteen fathoms within a mile of the shore.
It is a curious circumstance that the re-

connoissance of this line of coast was made by
